

MEF launches the professional certification of Carrier Ethernet Services

The recognition of the sector will allow people with knowledge and skills needed to boost the growth of Carrier Ethernet Services

LOS ANGELES, 04.07.2011 (informazione.it - press releases)

The MEF (Metro Ethernet Forum) today officially launched the third part of the widespread MEF Carrier Ethernet certification program. The new professional MEF certification program is designed for people who meet the requirements for Carrier Ethernet technology, services and applications experience. The test-CECP MEF (MEF's Carrier Ethernet Certified Professional) validates the knowledge of technology, standards and Carrier Ethernet applications.

Speaking at NetEvents 2011 APAC Press Summit in Malaysia, Nan Chen, President of the MEF, said: "With thirteen new service provider certificates and five only in the last quarter of 2010 we are seeing a sharp increase in the value of the MEF certification, expected to continue to grow.
