Extreme Networks, Inc. announced continued momentum in the high performance network market having increased its 10 Gigabit Ethernet (GbE) switch port shipments by 133% year over year (FY'11/'12) according to market share reports published by the Dell'Oro Group. In addition, revenue for Extreme Networks 10GbE modular and fixed switches grew at nearly twice the industry rate as published in Dell'Oro Group's Q2 2012 Ethernet Quarterly Report.

In the year-over-year comparison ending June 2012, Extreme Networks achieved a 50% revenue growth rate in high performance 10 GbE switch market. Demand for cloud and data center networking is on the rise, and according to the Dell'Oro Group's Ethernet Switch Five-Year Forecast announced this month, revenue from 10GbE switch sales will be the most impactful part of the overall Ethernet switch revenue by 2015.

"Our momentum with 10GbE switch revenue for customers building virtualized data centers,

Internet Exchanges and HPC infrastructure positions us well to accelerate our share in key markets," said David Ginsburg, chief marketing officer for Extreme Networks. "These results demonstrate that customers are taking notice of our best-in-class products."

Extreme Networks has more than 6,000 customers worldwide, including 19 of the top 20 mobile operators through our mobility partners. Extreme Networks also has more than 700 data center customers globally, including Abbot, Johns Hopkins University, Korea Telecom, Microsoft, Samsung, SingTel, and VMware.
