innovation 2013 awards

Announce technological innovation award 2013

"The awards granted under the 2013 Innovation Awards are a tribute to innovation and performance in the networking and telecommunications industry," explain the organizers.

IT Journal 04/23/13

An independent panel, which includes internationally renowned experts in the IT industry, as also editors of major international technology media and analyst organizations, officiate jury will select the winners of the awards, which will be delivered during the party celebration of the 40th anniversary of Ethernet, to be held on May 22, 2013 at the Computer History Museum, Mountain View, CA, USA.

The funds raised during the event and charity auction will be donated to the educational project STEM (Science, Technology, Engineering and Math).

The deadline for nominating candidates expires on April 30, 2013. Open to all suppliers of technology products and services launched during the last 18 months up to and including the day May 22, 2013. The nominal fee for the nomination of candidates will be donated to STEM Education.

The details of the awards, as also entry forms are available at www.NetEvents.org.

Organizations can participate in seven categories, and individuals in other, called "Ethernet Idol", which requires no participation charge.

Categories:

1. Carrier Ethernet Business Services -
2. Telecoms Product
3. Enterprise Wireless Solutions
4. Cloud / Datacenter Solution
5. Security Solution
6. SDN Solution
7. Hottest 'NEW' Networking Company

People can also nominate "Idol Ethernet", ie, an individual who inspired the inventors of Ethernet has made the greatest contribution to the innovation of Ethernet over the last 15 years.

"For both actors of the network segment is to service providers, these awards offer a unique opportunity to gain industry recognition to a massive global audience of decision makers at the highest level, and media observers," said Mark Fox, CEO of NetEvents. "The celebration of the 40th birthday of Ethernet will take place over two days, attracting the biggest names in the media and IT industry," said Fox, adding that the main elements of the event will be transmitted to organizations and educational training worldwide .

"This contribution, combined with STEM donations, represents a unique opportunity to help educate the innovators of tomorrow," says the CEO of NetEvents.
