A vision for Carrier Cloud Networking...

Itzik Weinstein, CEO

Cloud Services

“The Cloud is highly scalable, and managed infrastructure capable of hosting end-customer applications and billed by consumption.” - Forrester

Virtual providers

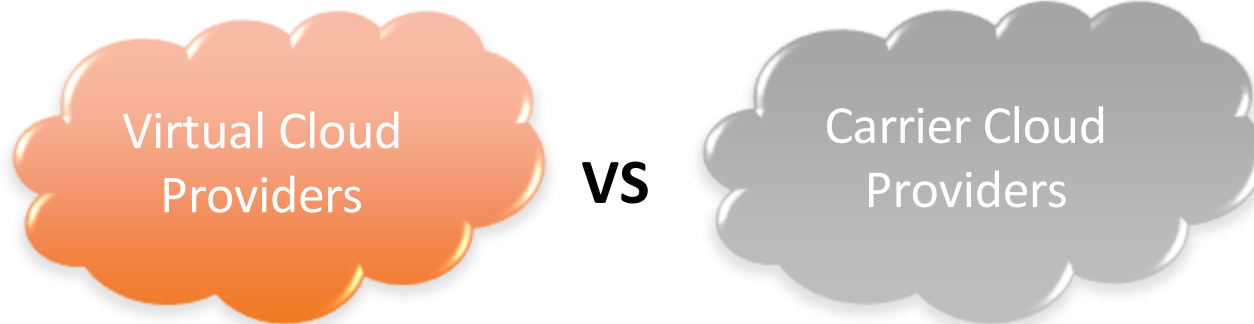

- Open access
- Commoditize infrastructure
- De-regulated

Carrier Cloud Providers

- ‘Walled garden’
- Infrastructure as value add
- Regulated

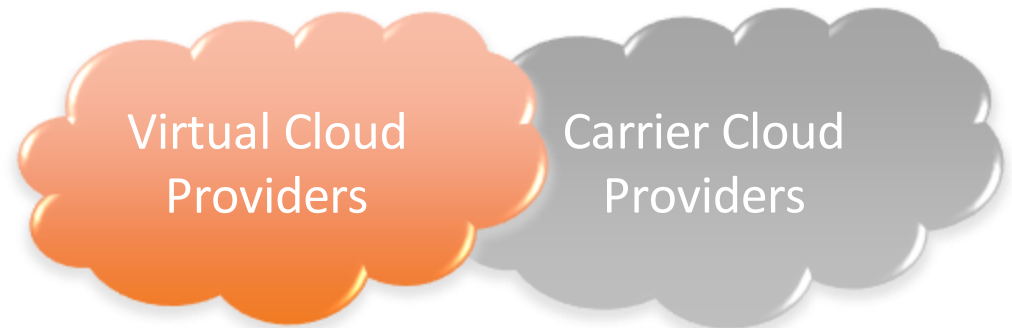

Different Motivation Similar Needs

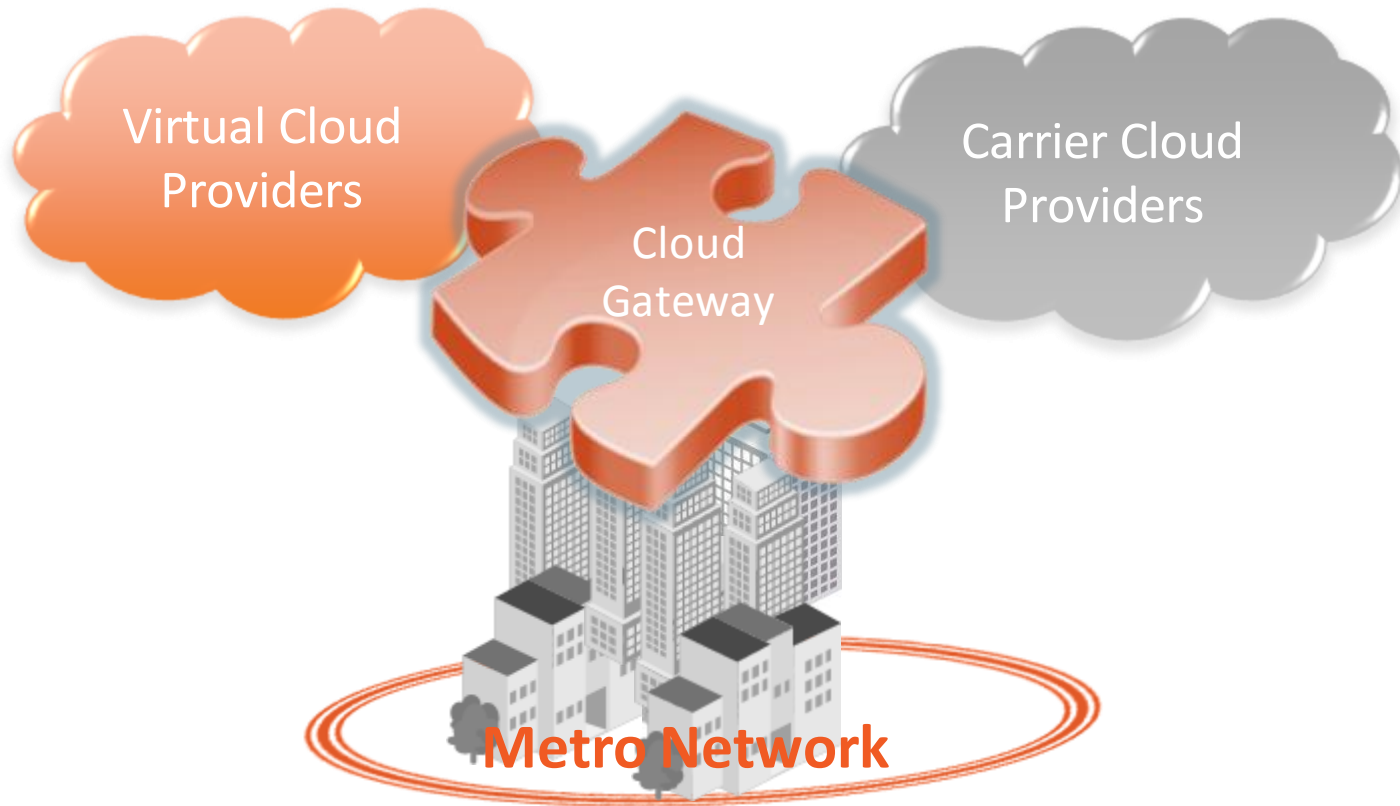

Quality of Experience

Carrier Cloud Advantage? Mix or similar needs?

- Elastic bandwidth – amount of bandwidth when needed real-time
- Use of services when needed (service on/off)
- Assured Quality of service
- Flow based management
 - Capacity
 - Security
 - Resiliency
 - Low Latency
 - Load Balancing
 - Caching/storage
 - Metro – Data Center inter-connect
 - Virtualization

The missing piece - Cloud Gateway

- New products category
- Open platform to service the needs of virtual and carrier cloud providers
- Virtual and Carrier inter-connect and optimization
- Add new services fast
- Pay for what you need

Thank You!
