

What New Managed Services Will Top APAC Enterprises' Wish Lists In 2013

February 2013

David Rosengrave

The Forecast is Bright for Hybrid Clouds

- In 2013 over 60% of Enterprises will have adopted Cloud Computing.
- If you can't switch workloads between public and private – you will loose competitiveness.
- Compliant Clouds will gain traction (PCI, HIPAA etc).

The Mobile Majority is Taking Charge

- 66% of employees use 2 or more mobile devices for work.
- Enterprises will need to cater the far reaching implications of this.
- The rise of the Personal Cloud.

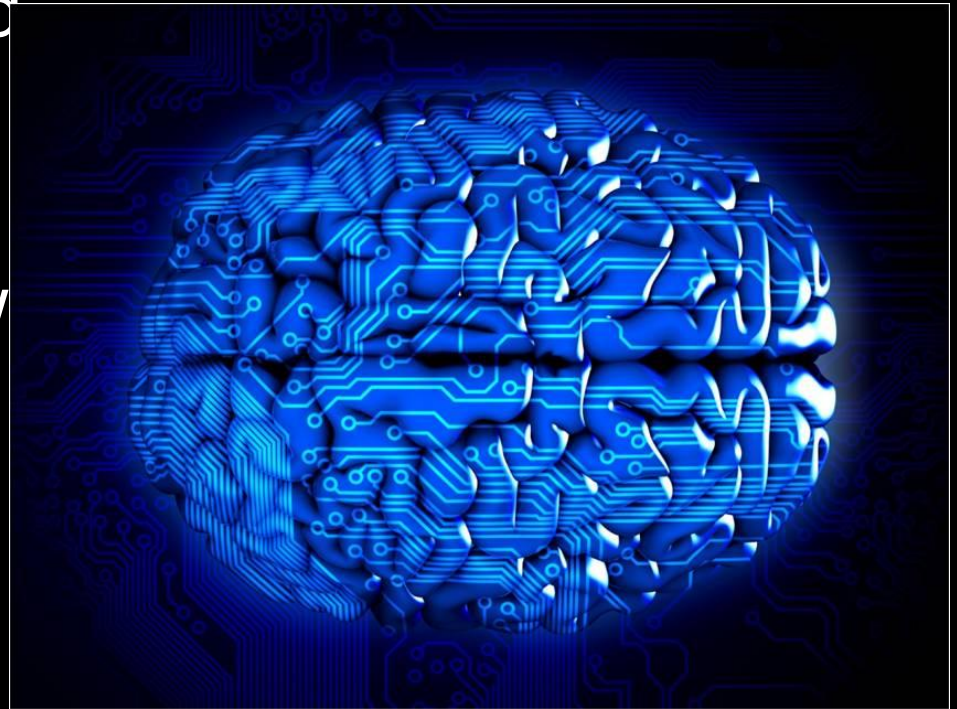

Connected Machines Will Drive New Insights

- The 'Internet of Things'.
- 30 Billion connected 'Things' by 2020.
- M2M is more than just smart meters and smart cars.

Networks will be Smarter than you and Invisible.

- An intelligent fabric connecting everyone and everything.
- Annual compound growth rate of 29%.
- A shift in 2013 to more dynamic networks, pervasive omnipresent networks.

Security is the New Arms Race

- Breaches span access, infrastructure and apps.
- Identity Security to be more prevalent during 2013.
- The Internet Opportunity comes at a price – the race is on to protect it.
