Submission topic: 'Ethernet Idol'

Some of us are old enough to remember the battle between Ethernet, Token Ring, VGAny-LAN and AppleTalk for supremacy in the LAN. Ethernet has not only won the battle for the LAN, it also now dominated the WAN. But who has successfully picked up the mantle from the original Ethernet inventors and contributed most to the on-going Innovation of Ethernet over the past 15 years? Why not nominate your "Ethernet Idol"?

Please nominate your top three 'Ethernet Idols' in order of priority and please explain as to why these individuals are eligible for this award

1st Ethernet Idol nomination name: _____

Details on why he/she should be given this award: _____

2nd Ethernet Idol nomination: _____

Details on why he/she should be given this award: _____

3rd Ethernet Idol nomination: _____

Details on why he/she should be given this award: _____

Computer History Museum We need more students that excel in science, math, technology and engineering to become a contributor to the global technology marketplace. High tech companies have vacancies due to a lack of qualified candidates, and the demand for scientists and mathematicians is projected to grow dramatically. Over 50% of US 8th graders receive instruction from a science and math teacher without a relevant degree or real world experience to inspire their students.

The Computer History Museum, as a 2012 STEM Innovation Award Winner, and HP Catalyst Initiative participant, is proud to raise money for Science, Technology, Engineering and Math (STEM) education by hosting the Ethernet Celebrity Auction.
