

**Company Introduction:**

From 1991, Network Magazine Taiwan (the Licensee of Network Magazine from CMP Group in US) has built up unparalleled authority and leadership in their reports on network related market, product, and technology. The Magazine expands her pages and circulation by enlarging the reports on the following areas: System integration, industry computerization, enabling database and software development tools, and local enterprise automation experience. The Magazine gradually turned to be one of the most influential media in Taiwan and in the Chinese community for purchase reference, decision maker, management, and learning. She becomes an indispensable assistant to large, medium, and small enterprises for their total solutions in networking and computing.
