Breaking Bad – New developments in cloud security

Introduced and Chaired by: Rob Ayoub
Research Director

Debate Session V

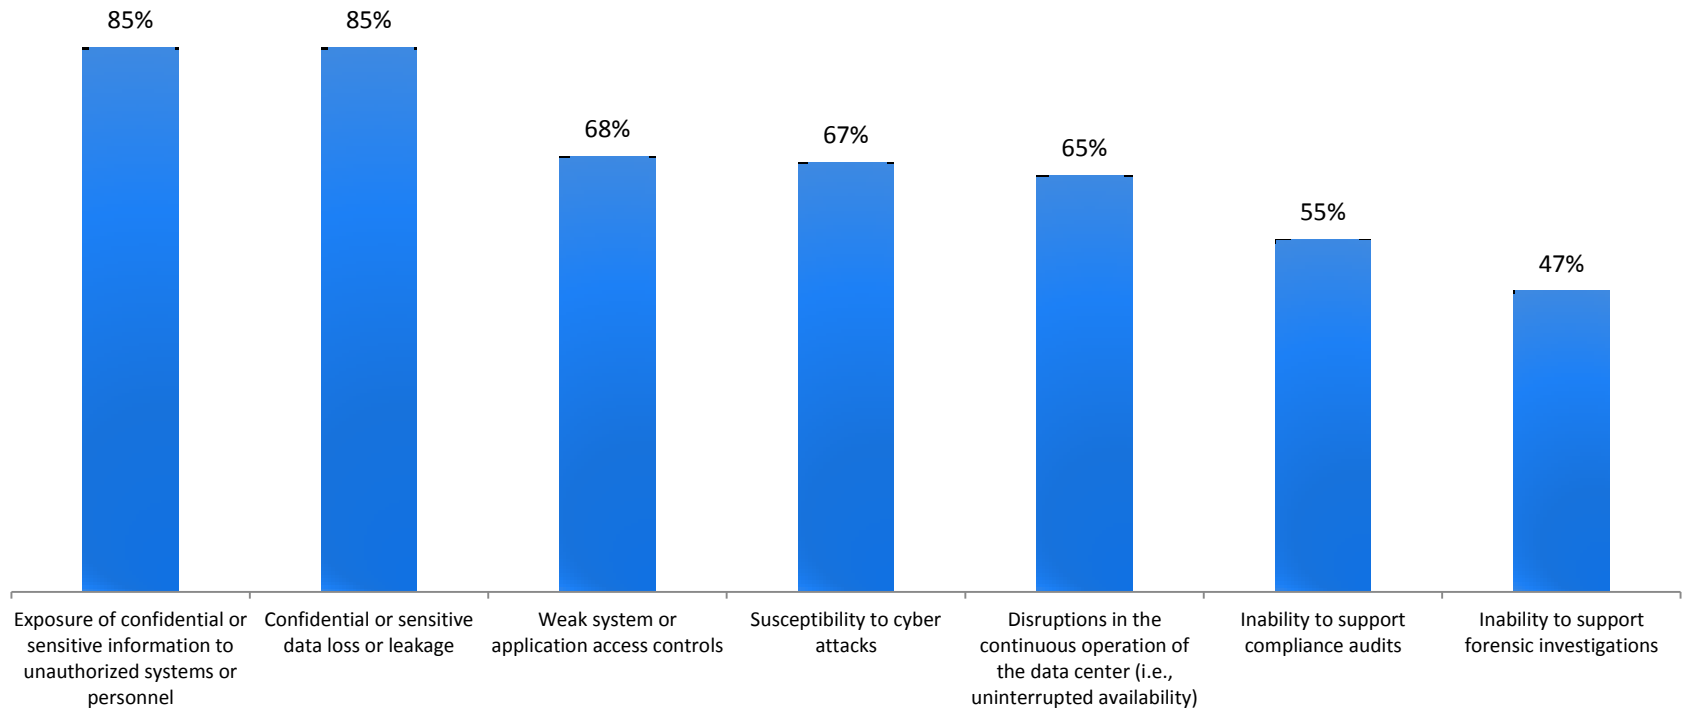

Breaking Bad

New developments in cloud security

WE MAKE SECURITY A SCIENCE

We Know the Concerns

Security pros still think of security like this...

But reality is moving towards this...

- Virtual appliances
- Mobile endpoint security
- Application specific security services (NFV)

How do we get there?

- Move from just talking about Cloud Security to solving specific challenges
- Takes a multi-prong approach
 - Hardware/virtual appliances
 - Endpoint software
 - Security-as-a-Service
 - Continuous testing

Thank You
