

APPLIED ARTIFICIAL INTELLIGENCE. IN CYBERSECURITY.

STUART MCCLURE | CEO

We make software that
predicts, then blocks,
cyberattacks on the endpoint
in real time using pre-execution
artificial intelligence algorithms.

CylancePROTECT®
leverages the power of
machines, not humans, to
dissect malware's DNA.
Artificial intelligence then
determines if the code is
safe to run.

The Future of Security

HOW DO WE DO IT?

ALGORITHMIC SCIENCE AND MACHINE LEARNING
