VeloCloud Cloud-Delivered SD-WAN enables enterprises to securely support application growth, network agility, and simplified branch and end point implementations while delivering optimized access to cloud services, private datacenters and enterprise applications. Global service providers are able to increase revenue, deliver advanced services and increase flexibility by delivering elastic transport, performance for cloud applications, and integrated advanced services all via a zero-touch deployment and operations model. Both enterprises and service providers benefit from the multi-tenant cloud gateway architecture and the ability to support real-time applications over private, broadband, and wireless links.

VeloCloud participated at important events, including:

- WAN Summit Singapore; Joseph Chung, Regional Vice President, Asia Pacific, panel titled “The Hybrid WAN – How SD-WAN, Internet, and Business Broadband are Changing the WAN” .
- TDM/Keystone Partner Event; VeloCloud CEO and Co-founder Sanjay Uppal. Keynote address.
- SD-WAN Summit 2016 Paris; Mr. Uppal presented “Managed SD-WAN: Why

Architecture Matters”. Mr. Uppal also on a panel titled “SD-WAN Lifecycle Management”.

- NetEvents Global Press & Analyst Summit; VeloCloud has been selected as a finalist by the award judges in the Hot Start-Up Cloud award category. Michael Wood, VP of Marketing, participated in the Conference Debate Session VIII “Next Generation WAN Services Empower Customers – But will Value-Added Services Add to Carrier Profits”.
- Telecom Council Carrier Connections (TC3) Summit; where Mr. Wood and Sumanth Sathyanarayana, Research Engineer for VeloCloud customer Deutsche Telekom, will jointly present a global carrier case study on Sept. 29 at 1:05 pm PDT on the main stage.
