

Faster, More Scalable, and Easier to Manage: Architectural and Management Trends in Next-Generation Data Centers

Ksenia Efimova, Senior Research Analyst

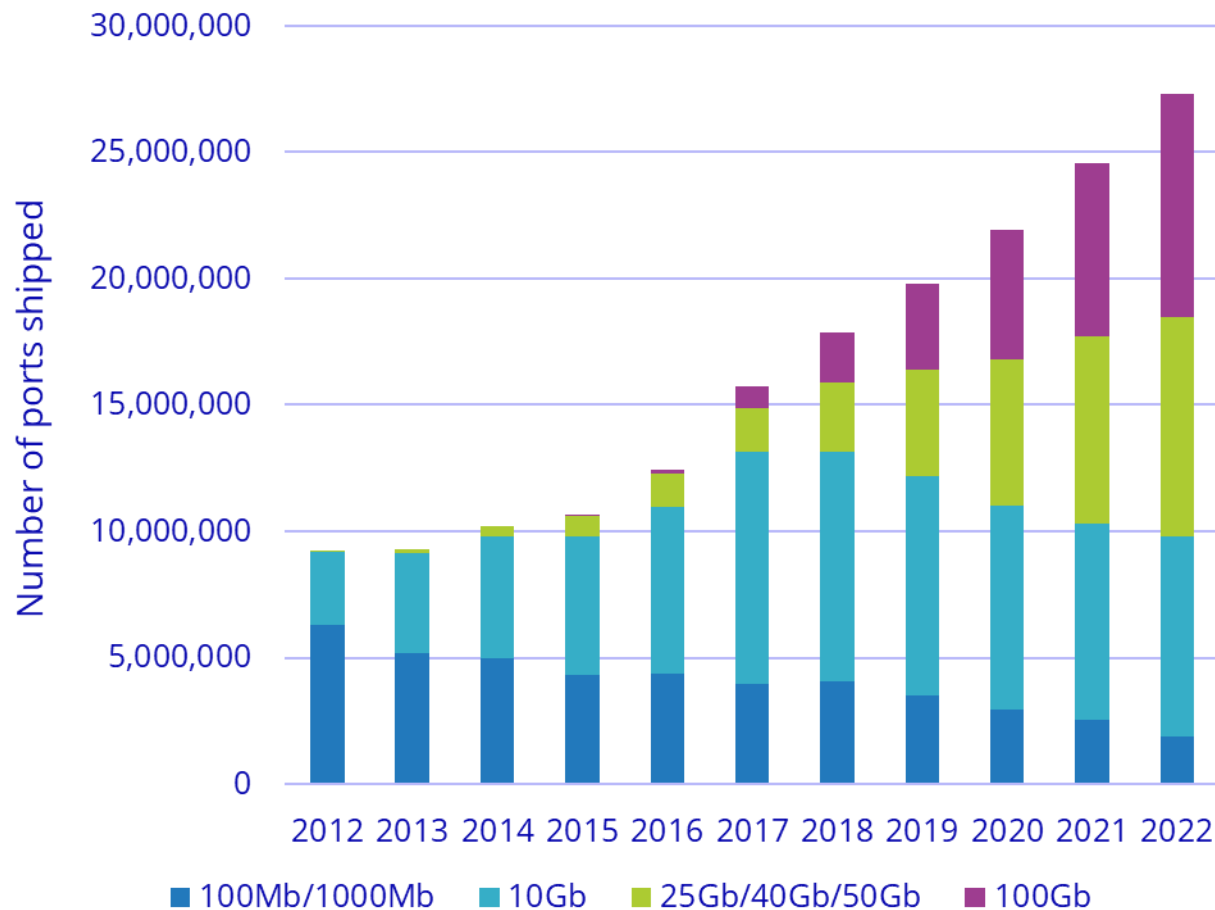

IDC

3rd platform influence on ICT market is increasing

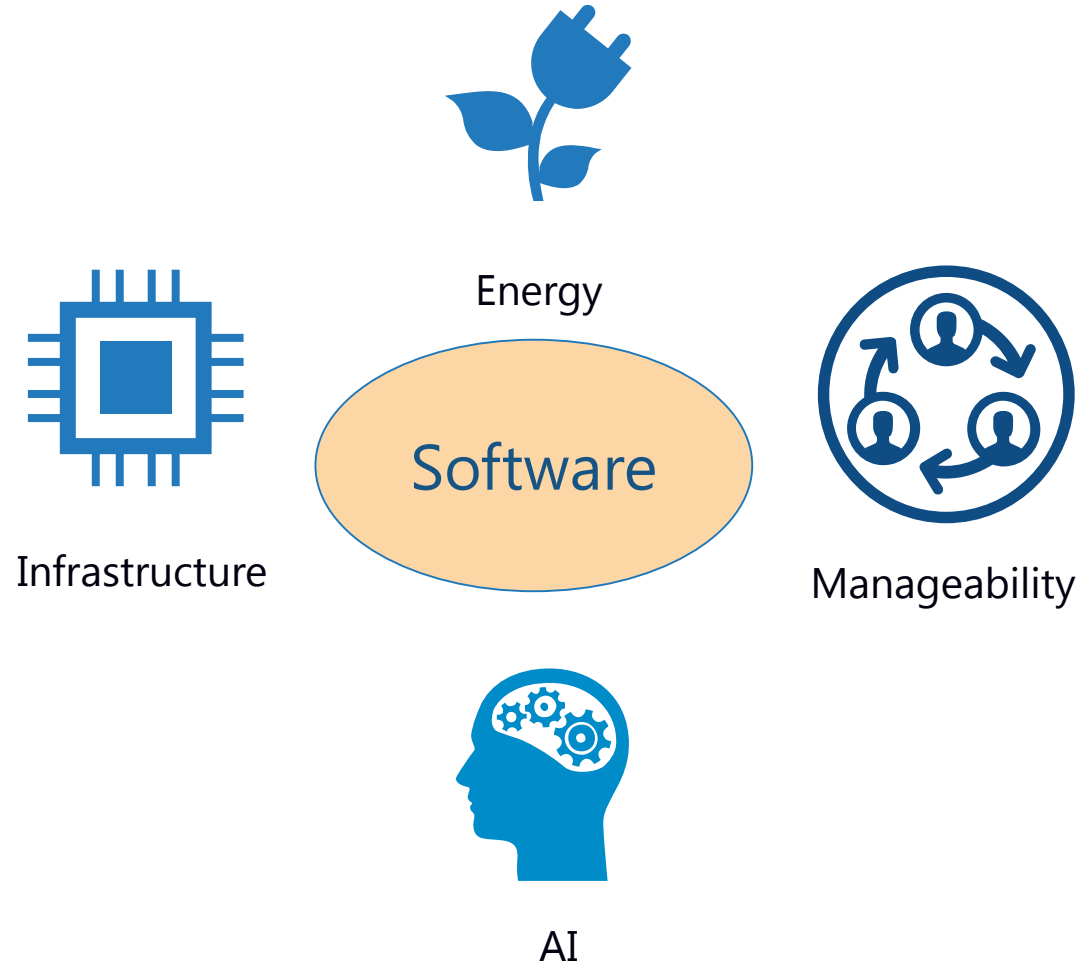

- Data is in the center of transformation
- Complexity is increasing

Cloud demand is pushing datacenter network bandwidths ever higher, and will continue to do so

- The explosion of data gathered by enterprises is addressed by higher speed switches.

To address changes DC should transform

Welcome the panelists
