

Business Continuity in the Face of Current and Future Challenges

Paul Hughes

Research Director, Future of Connectedness

February 15, 2023

2020 and 2021 defined the importance for transformation change for the enterprise. Today, ongoing market and economic disruption are top of mind

Accelerated digital transformation

Adapted to new work models

Transformed connectivity priorities, policies and processes

Supply Chain Constraints

Inflationary Pressure

Skills Gap

Russia-Ukraine War

*To prepare for novel business disruptions, organizations need plans that enable them to **stay connected** and **adapt not just respond**.*

The Future of Connectedness framework becomes a central driver of business resiliency and agility

Scalable, Secure Access Anytime, Anywhere

- Always on high performance networks provide guaranteed connections and bandwidth
- Adaptable to market conditions, enable smart, real-time data-driven decisions

Business Continuity and Reliability

- Network redundancy guarantees connectivity and alleviates scale issues
- Ability to stay connected during crisis to deliver on SLAs, maintain business

Real-Time Insights

- Allowing insights to be reviewed/understood 24/7 or as needed by the business
- Understand the need to scale access depending on demands for data

Pervasive Digital Experiences

- Ensure sufficient coverage and capacity to deliver digital information, commerce, collaboration among employees, customers, partners

Over half of enterprises worldwide still lack a defined and implemented connectivity resiliency strategy

Which of the following best represents your organization's connectivity resiliency strategy?

■ No overarching strategy and hence, network outages create significant business disruption due to lack of failover capabilities.

30.8%

■ Organization has understanding and road map of networks, solutions, and tools to help ensure business continuity.

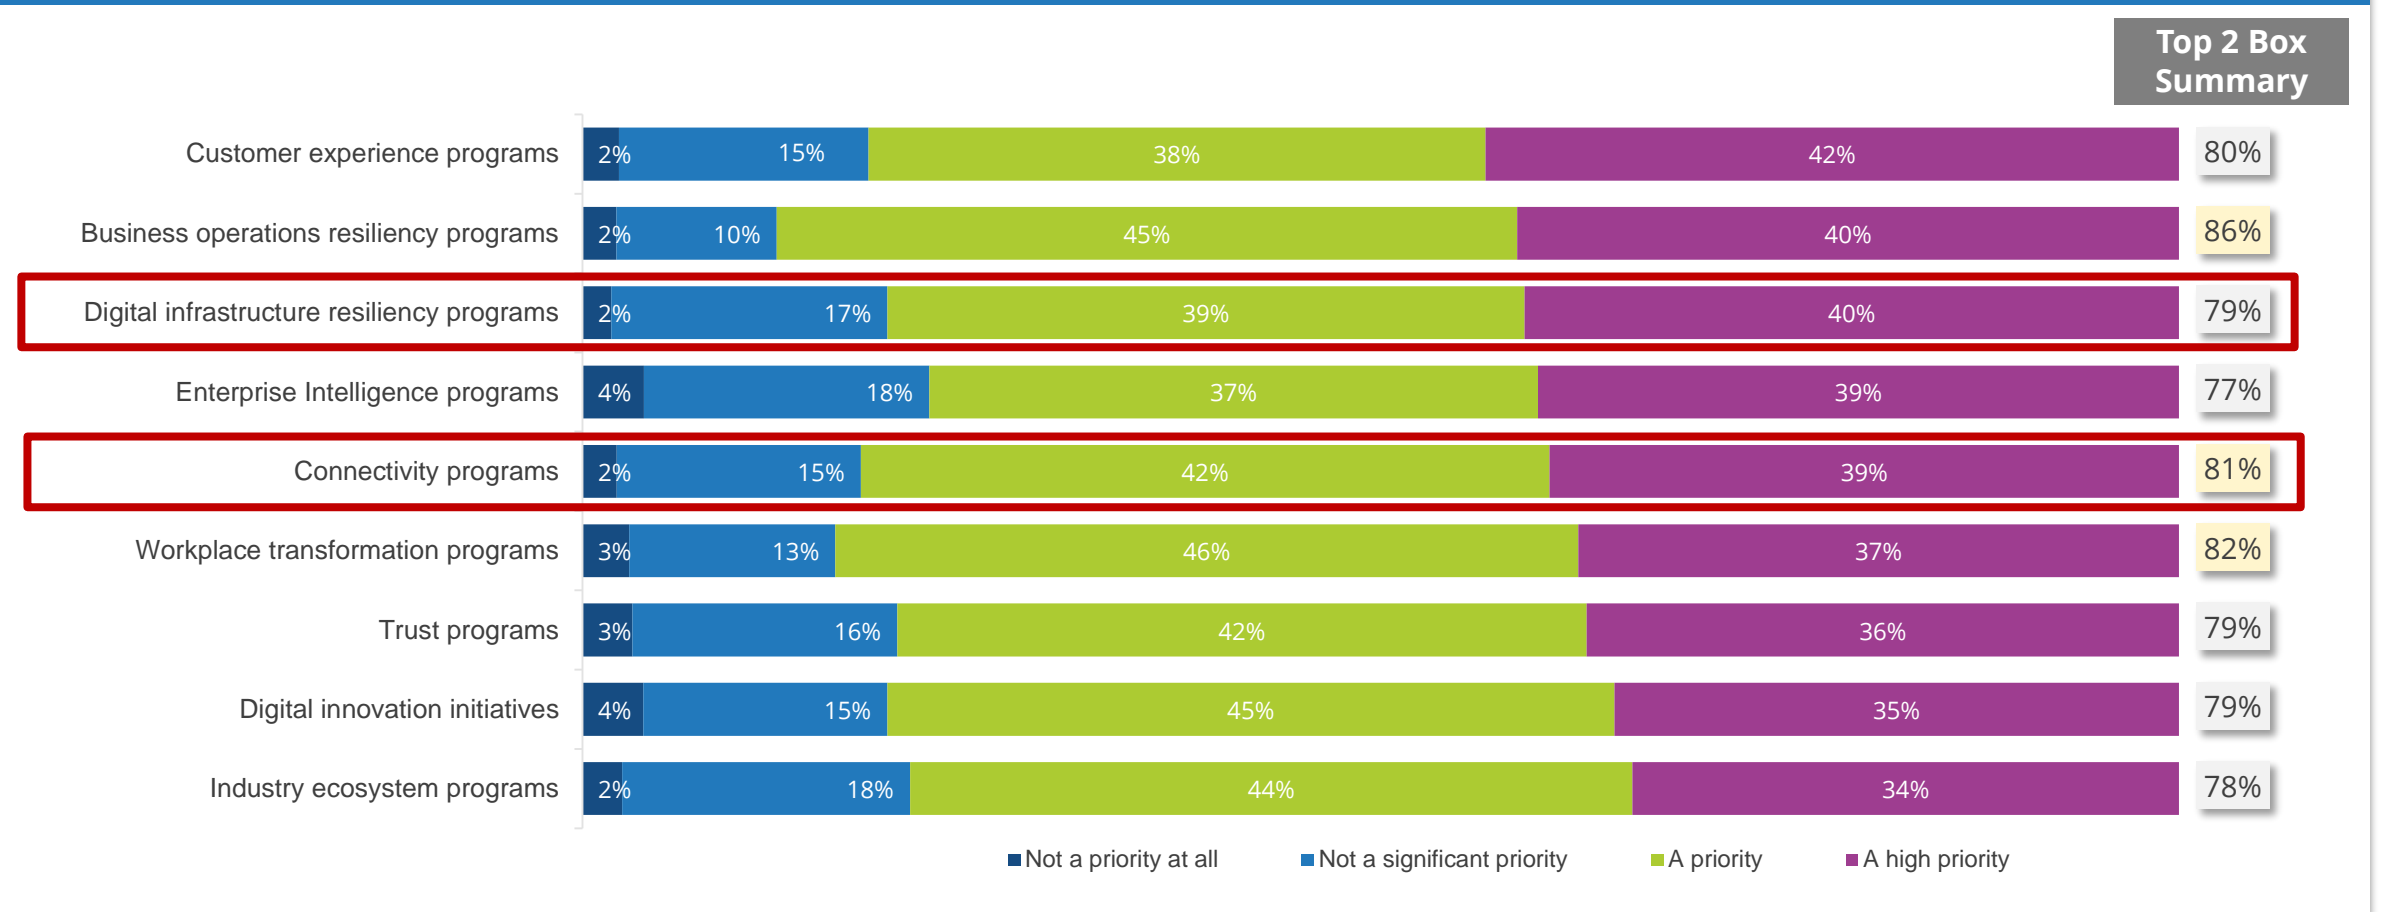

■ Multiple networks are available for distributed workforce to access applications and data, but with limited integration or oversight.

■ Resiliency strategy is defined, allowing for proactive management of unexpected network outages.

■ Organization has robust automated connectivity resiliency strategy in place and is able to seamless recover without any business disruption.

Expect companies to invest heavily on automation/augmentation, as well as on workplace transformation and connectivity as these programs would help improve customer experience, operational resiliency, and overall productivity

As a result of the uncertainties related to geopolitical tensions, inflation, supply chain disruptions, and managing the ongoing COVID-19 pandemic, how much of a priority will investments in the following areas be for the rest of 2022 and 2023?

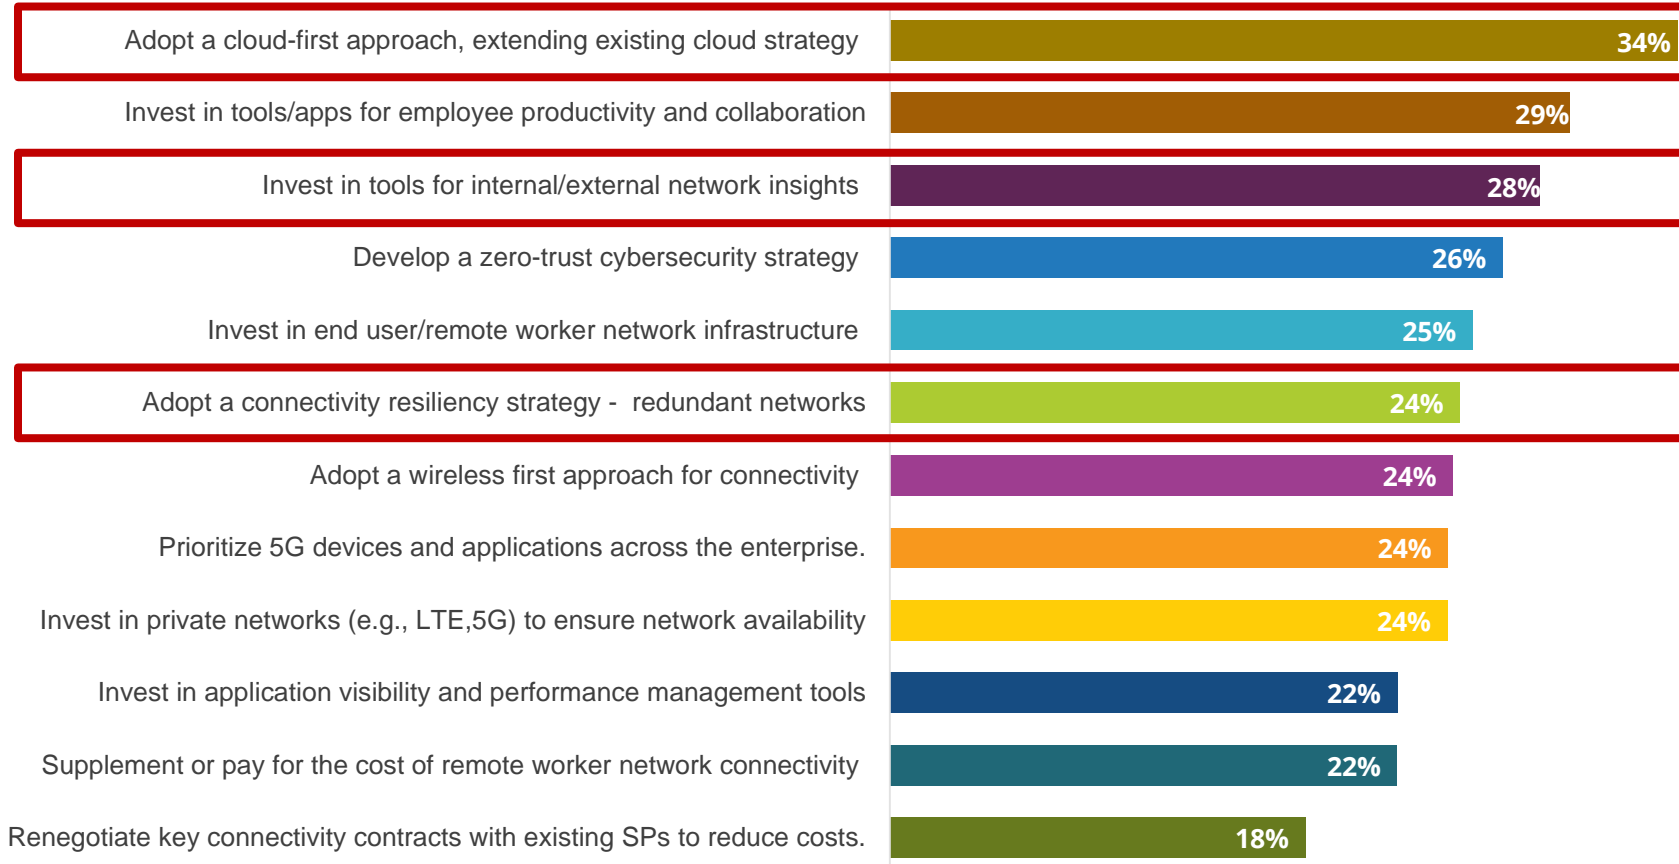

65% of organizations recognize the need to simplify, unify and standardize dedicated (on-premises) and shared (public) cloud infrastructure management and security to improve resiliency and reduce operational costs

Unifying the way we manage and secure dedicated on-prem and public cloud infrastructure to improve digital business resiliency - To what degree are each of these a current priority for your organization?

Cloud first migration, data intelligence and resiliency rank as top outcome driven priorities

Top 3 technology or business areas your organization will prioritize to improve business outcomes
